

# Temperature Conversions

F° = Degrees in Fahrenheit

C° = Degrees in Celsius  
(Centigrade)

To convert Fahrenheit to Celsius:  
Subtract 32 and multiply by  
0.55, thus  $68^{\circ}\text{F} = 20^{\circ}\text{C}$ .

To convert Celsius to Fahrenheit:  
Multiply by 1.8 and add 32, thus  
 $60^{\circ}\text{C} = 140^{\circ}\text{F}$ .
